Question No: 13

Multiple Choice (Select 1 out of 4 options, for the question below..)

If the price of a highly elastic agricultural product decreases by 10%, what is the expected percentage increase in quantity demanded?

- Options
- 10%
 - 20%
 - 200%
 - 100%

Multiple Choice (Select 1 out of 4 options, for the question below.)

Which of the following is a primary benefit of crop rotation in agriculture?

Options

- Increased pest infestations
- Soil depletion of nutrients
- Reduced soil erosion
- Higher monoculture yields
