A quote is given in this question after which a statement has been given. Read the quotation carefully and determine the statement based on the given quotation.

Amazon has acknowledged a case of data breach (data secrecy rule violation) related to highlighting users' names and email IDs, without giving details about the nature or scope of the event. However, the company has not disclosed the total number of users affected by the violation. An email has been sent to all affected users, which notifies them only about technical error. And now, this e-commerce giant is reportedly offering gift cards as compensation to their data breach victims. The Seattle headquarters e-commerce company has also offered gift cards between \$ 5 to \$ 100 for some of those users, who have been affected by this violation.

A publication citing an email correspondence between Amazon and the customer, Paul Gagnon said that when he called the customer service desk of the company and questioned the leaked data, the company would give him a promotional certificate worth \$ 100. Offered. When Gaganone could not be told about the data being leaked, then he was offered a \$ 100 apology apology. Many people affected by Breach filed a complaint with the company but none of them got any response from the company till now. It is being said that Amazon customers' supervisors have been instructed to comment on any kind of compensation or not to offer compensation to affected Amazon users.

Statement: Mr. Paul has received a promotional certificate worth \$ 100 as forgiveness, but there is no reason why the cause of data violation.

Choose the appropriate option from one of the following options

- A-Quote is definitely true.
B - statement is probably true
C-statement can not be determined.
D-statement is definitely false.

A quote is given in this question after which a statement has been given. Read the quotation carefully and determine the statement based on the given quotation.

Amazon has acknowledged a case of data breach (data secrecy rule violation) related to highlighting users' names and email IDs, without giving details about the nature or scope of the event. However, the company has not disclosed the total number of users affected by the violation. An email has been sent to all affected users, which notifies them only about technical error. And now, this e-commerce giant is reportedly offering gift cards as compensation to their data breach victims. The Seattle headquarters e-commerce company has also offered gift cards between \$ 5 to \$ 100 for some of those users, who have been affected by this violation.

A publication citing an email correspondence between Amazon and the customer, Paul Gagnon said that when he called the customer service desk of the company and questioned the leaked data, the company would give him a promotional certificate worth \$ 100. Offered. When Gaganon could not be told about the data being leaked to him, then he was offered \$ 100 as a replacement. Many people affected by Breach filed a complaint with the company but none of them got any response from the company till now. It is being said that Amazon customers' supervisors have been instructed to comment on any kind of compensation or not to offer compensation to affected Amazon users.

Statement: The Company informed all the users about data breach through mail.

Choose the appropriate option from one of the following options

- A-Quote is definitely true.
 B - The statement is probably true.
 C-statement can not be determined.
 D-statement is definitely false.
