A quote is given in this question, after which a statement has been given. Read the quotation carefully and determine the statement based on the quotation given.

Amazon has acknowledged a case of data breach (data secrecy rule violation) related to highlighting users' names and email IDs, without giving details about the nature or scope of the event. However, the company has not disclosed the total number of users affected by the violation. An email has been sent to all affected users, which notifies them only about technical error. And now, this e-commerce giant is reportedly offering gift cards as compensation to their data breach victims. The Seattle headquarters e-commerce company has also offered gift cards between \$ 5 to \$ 100 for some of those users, who have been affected by this violation.

A publication citing an email correspondence between Amazon and the customer, Paul Gagnon said that when he called the customer service desk of the company and questioned the leaked data, the company would give him a promotional certificate worth \$ 100. Offered. When Gaganone could not be told about the data being leaked, then he was offered \$ 100 as an apology. Many people affected by Breach filed a complaint with the company but none of them got any response from the company till now. It is being said that Amazon customers and supervisors have been instructed to comment on or not to offer any kind of compensation to affected Amazon users. "

Statement: The Company informed the affected users that due to technical error the data rules Has been violated.

Choose a suitable option from the following options

- A-Quote is certainly true.
- B - The statement is probably true.
- C-statement can not be determined.
- D-statement is definitely false.

- (A)  D - (Alternative 4)

A quote is given in this question after which a statement has been given. Read the quotation carefully and determine the statement based on the given quotation.

Amazon has acknowledged a case of data breach (data secrecy rule violation) related to highlighting users' names and email IDs, without giving details about the nature or scope of the incident. However, the company has not disclosed the total number of users affected by the violation. An email has been sent to all affected users, which notifies them only about technical error. Now, this e-commerce giant is presently offering gift cards as compensation to people

affected by their data breach. Seattle headquarters e-commerce company has also offered gift cards between \$ 5 to \$ 100 for some of those users who have been affected by this violation. A publication citing an email correspondence between Amazon and the customer, Paul Gagnon said that when he called the customer service desk of the company and questioned the leaked data, the company would give him a promotional certificate worth \$ 100. Offered. When Gaganone could not be told about the data being leaked, then he was offered \$ 100 as an apology. Many people affected by Breach filed a complaint with the company but none of them got any response from the company till now. It is being told that Amazon customers and the supervisors have been instructed to comment on or not to offer any kind of compensation to affected Amazon users. "

Statement: Mr. Paul is not only promoted as a \$ 100 promotional The certificate was found, but the reason for the data rule violation was also reported.

Select one of the following options, the appropriate option:

- A-Quote is definitely true.
- B - The statement is probably true.
- C-statement can not be determined.
- D-statement is definitely false.
