**Subject : SET2 SH 2 General English\_A**

**Question ID:- 1**

Read the passage and answer the question that follows by choosing the most appropriate option:

The roots of sustainable development can be traced back to the 1972 Stockholm Conference, where development was for the first time linked to environment, emphasising the need for efforts at the international level.

Sustainability is the ability of the earth's various systems including human cultural systems and economics, to survive and adapt to changing environmental conditions. Sustainable development implies a change in all aspects of life in a way that causes little damage to the environment. It is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

The chief cause of unsustainability is the exponential growth of human population and overexploitation of natural resources. In developing countries, resource exploitation occurs chiefly to meet the needs of every increasing human population for food, fuel, fodder and shelter. Various human activities like agriculture, deforestation, over-fishing, overuse of fresh water, etc. result in environmental degradation and social disintegration.

We have used technology to alter much of the rest of nature to meet our growing needs, like we have reduced biodiversity by destroying wildlife habitats. Some populations of pest species and disease causing bacteria have been strengthened through indiscriminate use of pesticides and antibiotics. Renewable resources have been used faster than they can be regenerated thus turning grasslands into deserts.

Sustainable development is further threatened by poverty, political instability, population growth, undernourishment and high consumption of natural resources. We need to act quickly to avoid disasters in the near future.

Sustainable development implies

1. a form of growth that does not meet the current human needs.
2. a form of development that overexploits natural resources.
3. a change in all aspects of life that causes little damage to the environment.
4. a form of growth that is meeting the needs of the present generation.

**Options:-**

- 1, Option ID :- 1,
- 2, Option ID :- 2,
- 3, Option ID :- 3,
- 4, Option ID :- 4,

**Answer Given:- 3, Option ID : -3**

---

**Question ID:- 4**

Read the passage and answer the question that follows by choosing the most appropriate option:

The roots of sustainable development can be traced back to the 1972 Stockholm Conference, where development was for the first time linked to environment, emphasising the need for efforts at the international level.

Sustainability is the ability of the earth's various systems including human cultural systems and economics, to survive and adapt to changing environmental conditions. Sustainable development implies a change in all aspects of life in a way that causes little damage to the environment. It is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

The chief cause of unsustainability is the exponential growth of human population and overexploitation of natural resources. In developing countries, resource exploitation occurs chiefly to meet the needs of every increasing human population for food, fuel, fodder and shelter. Various human activities like agriculture, deforestation, over-fishing, overuse of fresh water, etc. result in environmental degradation and social disintegration.

We have used technology to alter much of the rest of nature to meet our growing needs, like we have reduced biodiversity by destroying wildlife habitats. Some populations of pest species and disease causing bacteria have been strengthened through indiscriminate use of pesticides and antibiotics. Renewable resources have been used faster than they can be regenerated thus turning grasslands into deserts.

Sustainable development is further threatened by poverty, political instability, population growth, undernourishment and high consumption of natural resources. We need to act quickly to avoid disasters in the near future.

Sustainable development is threatened by

1. political stability
2. affluence
3. decrease in population
4. ozone depletion

**Options:-**

- 1, Option ID :- 13,
- 2, Option ID :- 14,
- 3, Option ID :- 15,

• 4, Option ID :- 16,

Answer Given:- 1, Option ID : -13

Question ID:- 3

Read the passage and answer the question that follows by choosing the most appropriate option:

The roots of sustainable development can be traced back to the 1972 Stockholm Conference, where development was for the first time linked to environment, emphasising the need for efforts at the international level.

Sustainability is the ability of the earth's various systems including human cultural systems and economics, to survive and adapt to changing environmental conditions. Sustainable development implies a change in all aspects of life in a way that causes little damage to the environment. It is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

The chief cause of unsustainability is the exponential growth of human population and overexploitation of natural resources. In developing countries, resource exploitation occurs chiefly to meet the needs of every increasing human population for food, fuel, fodder and shelter. Various human activities like agriculture, deforestation, over-fishing, overuse of fresh water, etc. result in environmental degradation and social disintegration.

We have used technology to alter much of the rest of nature to meet our growing needs, like we have reduced biodiversity by destroying wildlife habitats. Some populations of pest species and disease causing bacteria have been strengthened through indiscriminate use of pesticides and antibiotics. Renewable resources have been used faster than they can be regenerated thus turning grasslands into deserts.

Sustainable development is further threatened by poverty, political instability, population growth, undernourishment and high consumption of natural resources. We need to act quickly to avoid disasters in the near future.

Among the following, which one is not related to the use of technology to alter nature?

1. reduced biodiversity by destroying wildlife habitats
2. some populations of pest species and disease causing bacteria strengthened through use of pesticides and antibiotics
3. renewable resources have been used faster than they can be regenerated
4. developed high consumerism and political instability

Options:-

• 1, Option ID :- 9,

• 2, Option ID :- 10,

• 3, Option ID :- 11,

• 4, Option ID :- 12,

Answer Given:- 1, Option ID : -9

Question ID:- 5

Read the passage and answer the question that follows by choosing the most appropriate option:

The roots of sustainable development can be traced back to the 1972 Stockholm Conference, where development was for the first time linked to environment, emphasising the need for efforts at the international level.

Sustainability is the ability of the earth's various systems including human cultural systems and economics, to survive and adapt to changing environmental conditions. Sustainable development implies a change in all aspects of life in a way that causes little damage to the environment. It is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

The chief cause of unsustainability is the exponential growth of human population and overexploitation of natural resources. In developing countries, resource exploitation occurs chiefly to meet the needs of every increasing human population for food, fuel, fodder and shelter. Various human activities like agriculture, deforestation, over-fishing, overuse of fresh water, etc. result in environmental degradation and social disintegration.

We have used technology to alter much of the rest of nature to meet our growing needs, like we have reduced biodiversity by destroying wildlife habitats. Some populations of pest species and disease causing bacteria have been strengthened through indiscriminate use of pesticides and antibiotics. Renewable resources have been used faster than they can be regenerated thus turning grasslands into deserts.

Sustainable development is further threatened by poverty, political instability, population growth, undernourishment and high consumption of natural resources. We need to act quickly to avoid disasters in the near future.

Choose the pair of words from the following which means the same as 'exponential' and 'indiscriminate', respectively.

1. sharp increase; random
2. decrease; careful
3. rise; systematic
4. reduce; confused

**Options:-**

- 1, Option ID :- 17,
- 2, Option ID :- 18,
- 3, Option ID :- 19,
- 4, Option ID :- 20,

**Answer Given:- 3, Option ID : -19**

**Question ID:- 2**

Read the passage and answer the question that follows by choosing the most appropriate option:

The roots of sustainable development can be traced back to the 1972 Stockholm Conference, where development was for the first time linked to environment, emphasising the need for efforts at the international level.

Sustainability is the ability of the earth's various systems including human cultural systems and economics, to survive and adapt to changing environmental conditions. Sustainable development implies a change in all aspects of life in a way that causes little damage to the environment. It is meeting the needs of the present without compromising the ability of future generations to meet their own needs.

The chief cause of unsustainability is the exponential growth of human population and overexploitation of natural resources. In developing countries, resource exploitation occurs chiefly to meet the needs of every increasing human population for food, fuel, fodder and shelter. Various human activities like agriculture, deforestation, over-fishing, overuse of fresh water, etc. result in environmental degradation and social disintegration.

We have used technology to alter much of the rest of nature to meet our growing needs, like we have reduced biodiversity by destroying wildlife habitats. Some populations of pest species and disease causing bacteria have been strengthened through indiscriminate use of pesticides and antibiotics. Renewable resources have been used faster than they can be regenerated thus turning grasslands into deserts.

Sustainable development is further threatened by poverty, political instability, population growth, undernourishment and high consumption of natural resources. We need to act quickly to avoid disasters in the near future.

Environmental degradation and social disintegration are the result of

1. land clearing for urbanisation and industrialisation.
2. afforestation.
3. scarcity of water.
4. fall in agricultural activity.

**Options:-**

- 1, Option ID :- 5,
- 2, Option ID :- 6,
- 3, Option ID :- 7,
- 4, Option ID :- 8,

**Answer Given:- 2, Option ID : -6**

**Subject : SET2 SH 2 General English\_B**

**Question ID:- 6**

Read the passage and answer the question that follows by choosing the most appropriate option:

Planet, People, Profit: The 3Ps of the triple bottom line approach, which form the core of sustainable business operations, are more intertwined and inseparable today than they ever have been in the past. Natural calamities, global warming and governance issues are impacting reputations and businesses, along with heightened shareholder and consumer activism, and increased regulatory scrutiny. As a result, enterprises are compelled to take a hard look at the way they conduct their businesses and make sweeping changes in a bid to future-proof themselves.

An example of the way in which the landscape is changing can be found in the Indian banking system. The Reserve Bank of India, recently proposed integrating climate-related risks into its practice of monitoring the stability of the financial system and modelling climate risk scenarios to identify vulnerabilities. This could imply that banks and financial institutions would need to chalk out new frameworks, imbibe climate change-related concerns into their credit decisions and risk management functions.

Globally, communities and corporations are re-evaluating priorities and redefining purpose at individual and collective levels. There has been a conscious crossover to a value addition approach, which goes beyond profits and pay cheques.

Champions of climate change, software engineers going back to their villages to start organic farming, start-up founders obsessed with leveraging technology to solve the problem of access to financial services, and teachers imparting education to underprivileged students are the real-life heroes of today. To them, 'why we do' matters as much as 'what we do'.

Consequently, ESG (environmental awareness, social responsibility and good governance) have become the focal points of the lens through which governments, corporates and individuals are looking at their day-to-day jobs and decision-making.

The central idea of the passage is

1. about sustainable business operations.
2. sustainable development.
3. change in the Indian banking system.
4. integrating climate-related risks with the financial system.

**Options:-**

- 1, Option ID :- 21,
- 2, Option ID :- 22,
- 3, Option ID :- 23,
- 4, Option ID :- 24,

**Answer Given:- Not Attempted**

**Question ID:- 7**

Read the passage and answer the question that follows by choosing the most appropriate option:

Planet, People, Profit: The 3Ps of the triple bottom line approach, which form the core of sustainable business operations, are more intertwined and inseparable today than they ever have been in the past. Natural calamities, global warming and governance issues are impacting reputations and businesses, along with heightened shareholder and consumer activism, and increased regulatory scrutiny. As a result, enterprises are compelled to take a hard look at the way they conduct their businesses and make sweeping changes in a bid to future-proof themselves.

An example of the way in which the landscape is changing can be found in the Indian banking system. The Reserve Bank of India, recently proposed integrating climate-related risks into its practice of monitoring the stability of the financial system and modelling climate risk scenarios to identify vulnerabilities. This could imply that banks and financial institutions would need to chalk out new frameworks, imbibe climate change-related concerns into their credit decisions and risk management functions.

Globally, communities and corporations are re-evaluating priorities and redefining purpose at individual and collective levels. There has been a conscious crossover to a value addition approach, which goes beyond profits and pay cheques.

Champions of climate change, software engineers going back to their villages to start organic farming, start-up founders obsessed with leveraging technology to solve the problem of access to financial services, and teachers imparting education to underprivileged students are the real-life heroes of today. To them, 'why we do' matters as much as 'what we do'.

Consequently, ESG (environmental awareness, social responsibility and good governance) have become the focal points of the lens through which governments, corporates and individuals are looking at their day-to-day jobs and decision-making.

Among the following, which one is **NOT** true about the 'value-addition approach'?

1. Corporates go beyond profits and pay cheques.
2. Many corporate workers are going back to their villages to start organic farming.
3. Some teachers are going to villages and imparting education to the underprivileged students.
4. Start up founders are obsessed with technology.

**Options:-**

- 1, Option ID :- 25,
- 2, Option ID :- 26,
- 3, Option ID :- 27,
- 4, Option ID :- 28,

**Answer Given:- Not Attempted**

**Question ID:- 10**

Read the passage and answer the question that follows by choosing the most appropriate option:

Planet, People, Profit: The 3Ps of the triple bottom line approach, which form the core of sustainable business operations, are more intertwined and inseparable today than they ever have been in the past. Natural calamities, global warming and governance issues are impacting reputations and businesses, along with heightened shareholder and consumer activism, and increased regulatory scrutiny. As a result, enterprises are compelled to take a hard look at the way they conduct their businesses and make sweeping changes in a bid to future-proof themselves.

An example of the way in which the landscape is changing can be found in the Indian banking system. The Reserve Bank of India, recently proposed integrating climate-related risks into its practice of monitoring the stability of the financial system and modelling climate risk scenarios to identify vulnerabilities. This could imply that banks and financial institutions would need to chalk out new frameworks, imbibe climate change-related concerns into their credit decisions and risk management functions.

Globally, communities and corporations are re-evaluating priorities and redefining purpose at individual and collective levels. There has been a conscious crossover to a value addition approach, which goes beyond profits and pay cheques.

Champions of climate change, software engineers going back to their villages to start organic farming, start-up founders obsessed with leveraging technology to solve the problem of access to financial services, and teachers imparting education to underprivileged students are the real-life heroes of today. To them, 'why we do' matters as much as 'what we do'.

Consequently, ESG (environmental awareness, social responsibility and good governance) have become the focal points of the lens through which governments, corporates and individuals are looking at their day-to-day jobs and decision-making.

Choose the pair of words from the following which means the same as 'imbibe' and 'leverage', respectively.

1. impact; receive
2. internalise; utilise
3. accept; lift up
4. influence; relaxation

**Options:-**

- 1, Option ID :- 37,
- 2, Option ID :- 38,
- 3, Option ID :- 39,
- 4, Option ID :- 40,

**Answer Given:- 1, Option ID : -37**

**Question ID:- 8**

Read the passage and answer the question that follows by choosing the most appropriate option:

Planet, People, Profit: The 3Ps of the triple bottom line approach, which form the core of sustainable business operations, are more intertwined and inseparable today than they ever have been in the past. Natural calamities, global warming and governance issues are impacting reputations and businesses, along with heightened shareholder and consumer activism, and increased regulatory scrutiny. As a result, enterprises are compelled to take a hard look at the way they conduct their businesses and make sweeping changes in a bid to future-proof themselves.

An example of the way in which the landscape is changing can be found in the Indian banking system. **Question ID:- 27**

Of the four given options, choose the most appropriate one.

1. My sister is the poet and the philosopher.

2. My sister is a poet and philosopher.

3. My sister is a poet and the philosopher.

4. My sister is poet and philosopher.

**Options:-**

• 1, Option ID :- 105,

• 2, Option ID :- 106,

• 3, Option ID :- 107,

- 4, Option ID :- 108,  
Answer Given:- 2, Option ID : -106

Question ID:- 45

Choose the alternative which can replace the underlined word without changing the meaning of the sentence.

Arun was able to see the futility of his work after 20 years.

1. fruitfulness
2. results
3. worthlessness
4. benefits

Options:-

- 1, Option ID :- 177,
- 2, Option ID :- 178,
- 3, Option ID :- 179,
- 4, Option ID :- 180,  
Answer Given:- 3, Option ID : -179

Question ID:- 42

Choose the alternative which can replace the underlined word without changing the meaning of the sentence.

The need of the hour is to initiate the renaissance of moral conscience and halt the rampant corruption for it could even hasten the end of our civilisation.

1. rise
2. introduction
3. significance
4. revival

Options:-

- 1, Option ID :- 165,
- 2, Option ID :- 166,
- 3, Option ID :- 167,
- 4, Option ID :- 168,  
Answer Given:- 3, Option ID : -167

Question ID:- 47

Fill in the blanks:

There is no glory in war \_\_\_\_\_ the blood it \_\_\_\_\_.

1. considering; sheds
2. comparing; spills
3. worth; costs
4. thinking; demands

**Options:-**

• 1, Option ID :- 185,

• 2, Option ID :- 186,

• 3, Option ID :- 187,

• 4, Option ID :- 188,

**Answer Given:- 3, Option ID : -187**

**Question ID:- 16**

Choose the most logical order of sentences from among the four choices to construct a coherent paragraph.

- A. The man who is perpetually hesitating over which of the two things he will do first, will do neither.
- B. He fluctuates from opinion to opinion and veers like a weather-cock.
- C. Instead of being progressive in anything, he will be at best stationary and most probably regress in all.
- D. It is only the man who first consults wisely, then resolves firmly, that can advance to eminence in any time.
1. A, B, D, C
  2. B, A, C, D
  3. A, B, C, D
  4. C, D, A, B

**Options:-**

• 1, Option ID :- 61,

• 2, Option ID :- 62,

• 3, Option ID :- 63,

• 4, Option ID :- 64,

**Answer Given:- 3, Option ID : -63**

**Question ID:- 13**

Choose the alternative which is closest to the opposite in meaning of the underlined word in the sentence.

You will have to conform to the rules if you want to stay here.

1. adjust
2. observe
3. disobey
4. comply

**Options:-**

- 1, Option ID :- 49,
- 2, Option ID :- 50,
- 3, Option ID :- 51,
- 4, Option ID :- 52,

**Answer Given:- 3, Option ID : -51**

---

**Question ID:- 17**

Choose the most logical order of sentences from among the four choices to construct a coherent paragraph.

- A. Nature seems to have taken particular care to disseminate her blessings among the different regions of the world.
- B. Therefore, the natives of several parts of the globe have a kind of dependence upon one another.
- C. The infusion of a china plant is sweetened by the pith of an Indian cane.
- D. The food often grows in one country and sauce is prepared in another.

Choose the **correct** answer from the options given below:

1. A, D, C, B
2. A, C, D, B
3. A, B, D, C
4. A, D, B, C

**Options:-**

- 1, Option ID :- 65,
- 2, Option ID :- 66,
- 3, Option ID :- 67,
- 4, Option ID :- 68,

**Answer Given:- 4, Option ID : -68**

---

**Question ID:- 18**

Choose the most logical order of sentences from among the four choices to construct a coherent paragraph.

- A. Such a place is called Oasis.
- B. A great part of Arabia is desert.
- C. The sand is so hot that you cannot walk over it with your bare feet in the day time.
- D. However, springs of water here and there come up from under the ground that enable vegetation to grow.

Choose the **correct** answer from the options given below:

- 1. A, C, D, B
- 2. B, C, A, D
- 3. B,C, D, A
- 4. C, D, B, A

**Options:-**

- 1, Option ID :- 69,
- 2, Option ID :- 70,
- 3, Option ID :- 71,
- 4, Option ID :- 72,

**Answer Given:- 4, Option ID : -72**

---

**Question ID:- 12**

Choose the alternative which is closest to the opposite in meaning of the underlined word in the sentence.

Do not run after the momentary pleasures of this transient world.

- 1. brief
- 2. ephemeral
- 3. passing
- 4. permanent

**Options:-**

- 1, Option ID :- 45,
- 2, Option ID :- 46,
- 3, Option ID :- 47,
- 4, Option ID :- 48,

**Answer Given:- 2, Option ID : -46**

---

**Question ID:- 24**

Choose the option which can be substituted for the given words/sentence.

a record of one's life written by somebody else

1. bibliography
2. biography
3. topography
4. autobiography

**Options:-**

- 1, Option ID :- 93,
- 2, Option ID :- 94,
- 3, Option ID :- 95,
- 4, Option ID :- 96,

**Answer Given:- 2, Option ID : -94**

**Question ID:- 46**

Fill in the blanks:

Those who live in \_\_\_\_\_ houses should not throw \_\_\_\_\_ at others.

1. big, abuse
2. own, challenges
3. stone, bricks
4. glass, stones

**Options:-**

- 1, Option ID :- 181,
- 2, Option ID :- 182,
- 3, Option ID :- 183,
- 4, Option ID :- 184,

**Answer Given:- 4, Option ID : -184**

**Question ID:- 15**

Choose the alternative which is closest to the opposite in meaning of the underlined word in the sentence.

We should not belittle others' achievements.

1. encourage
2. criticise
3. inspire
